## **Suncome Launch SteriWasher™ - The Robust, Heavy Duty, Validateable Parts Washer**

**Suncombe** - the premier washing, cleaning and critical process engineers have launched their **SteriWasher™** this week (July 7), an innovative new robust, heavy duty validateable parts washer.

The new **SteriWasher™**, a large washer used for industrial purposes is set to improve upon part washers used in the pharmaceutical, biotech, food, beverage, healthcare and other critical sectors, by means of new technologies to provide a more environmentally friendly, low water and energy usage washing facility in production and research environments for equipment ranging from critical small parts and tools to large mixers, drums and containers.

Unlike many part washers on the market that use fold down doors, the **SteriWasher** is accessed via a hinged door, to provide a more robust machine and a washing chamber. It employs a combination of specially developed variable duty spray technologies, developed to provide variable pressures for different levels of washing; this provides high energy impingement washing together with low energy flushing chosen by a simple recipe selection.

Incorporating crevice free internals, the washers are fitted with an air tight, leak-proof inflatable door seal for total product and washing containment and are available with a single door or two door versions for pass-through requirements. The washers also incorporate standard or bespoke racks

with individual locations for validated cleaning, which are removable and can be loaded onto mobile trolleys for loading and unloading.

The **SteriWasher™** are available in single door, straight-through two door or 90 degree two door pass-through versions, are built from 316 stainless steel to cGMP, EHEDG, ASME BPE and GAMP standards and can be freestanding or integrated into your facility, located in your wash area or clean rooms.

Offered with a number of chamber sizes starting from 0.6 m x 0.6m x 0.6m to the largest size of 1.5 m x 1.5 m x 1.5 m, the **SteriWasher™** is also available in bespoke chamber size variants to meet the industries need.

Steve Overton, the Technical Director at Suncombe comments: “The **SteriWasher™** Parts Washers defines a range of bespoke parts washers we have been supplying for over 30 years. These washers are robust, heavy duty units, built entirely from stainless steel and designed to last for 20 plus years. Our clients have shown a great deal of interest in a more robust washer, with a simple hinged door, to ensure continued usability, throughout the units’ long lifetime.”

Obtainable with 4 levels of automation systems, from Suite#1, a single recipe system, to Suite#4, a 100 recipe system with full traceability and electronically compliant reporting, the Washers intuitive operator interface includes a colour HMI with full equipment visualisation and 10 levels of password protection. Complete with self-diagnostic features, the operator interface allows configuration of the cycle steps which include up to three concentration controlled chemical washes, hot water, cold water, variable temperatures, pressures and flowrates and HEPA cooling and drying facilities.

Complementing our extensive range of Washers, CIPs, Process and BioWaste Decontamination Systems, the new **SteriWasher™** is manufactured in the United Kingdom and is available worldwide through our sales networks.
