

Commissioning

To ensure that our equipment performs to the highest level we offer a range of services to our customers worldwide, using suitably trained and qualified engineers.

Typical service includes

- Survey installed equipment - check alignment and access
- Check utility connections (air and power)
- Individual machine test – with and without materials
- Full system test – with and without materials
- Run all equipment at upper and lower operational limits
- Check all safety equipment, interlocks and systems
- Final inspection and report
- Leaving working area clean and tidy
- Travelling to / from site, accommodation and living expense
- Working during normal working hours

Typical service excludes

- Providing packaging materials for setting and test
- Utility supply (air and power)
- Working overtime, weekends or holidays (to be charged at Suncombe standard service rates).
