

Customer Site Training

To ensure that our customers continue to get the very best performance from our equipment we offer comprehensive training to operators and engineers on their site.

Typical service includes

- Classroom, factory floor and on-the-job training
- Safety training for all those who will work with equipment
- Operator training in how to configure and operate equipment
- Engineer training in preventive and emergency maintenance
- Review of essential documentation and parts lists
- Customer personnel certification (if required)
- Travelling to / from site, accommodation and living expense
- Working during normal working hours

Typical service excludes

- Working overtime, weekends or holidays (to be charged at Suncombe standard service rates).
