

# Site Acceptance Testing (SAT)

To ensure that we meet the User Requirement Specification we carry out thorough testing on all our equipment, together with our customers, before we leave site.

## Typical service includes

- Comprehensive testing protocol – pre-agreed with customer
- Documentation review – drawings, manuals, parts lists, certificates....
- Checking all machines for completeness
- Verification against contractual requirements and drawings
- Functional testing of individual and combined equipment
- Performance testing to prove achievement of requirements
- Final inspection of equipment and components
- Leaving working area clean and tidy
- Travelling to / from site, accommodation and living expense
- Working during normal working hours

## Typical service excludes

- Providing raw materials for testing (this is by the customer)
- Utility supply (air and power)
- Working overtime, weekends or holidays (to be charged at Suncombe standard service rates).
